## Professional Summary

Detail-oriented Information Technology graduate with a strong foundation in programming, problem-solving, and web development. Skilled in Python, SQL, Java, and modern web technologies, with hands-on experience building database applications, responsive user interfaces, and machine learning models. Certified in Data Structures and Web Development, eager to leverage core technical skills in an entry-level software development role.

## Education

|                                                                                                                    |                    |
|--------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>Anil Neerukonda Institute Of Technology and Sciences</b><br><i>B.Tech in Information Technology</i>   GPA: 7.06 | <b>2023 – 2026</b> |
| <b>Sankethika Polytechnic College</b><br><i>Diploma in Information Technology</i>   GPA: 7.19                      | <b>2019 – 2023</b> |
| <b>Pallavi Vidhya Mandir School</b><br><i>Secondary School Certificate (SSC)</i>   GPA: 9.3                        | <b>2018 – 2019</b> |

## Technical Skills

- **Languages:** Python, SQL
- **Web Technologies:** HTML, CSS
- **Databases:** Oracle Database, MySQL
- **Core Concepts:** Data Structures & Algorithms, DBMS, Git, Github, Object-Oriented Programming (OOPs)
- **Soft Skills:** Logical Thinking, Problem Solving, Teamwork, Effective Communication

## Projects

### AI-Powered Predictive Grievance Management System

- Developed an automated grievance resolution pipeline using ML and NLP models to classify user complaints and accurately predict SLA breaches with 92% model accuracy.
- Architected high-performance RESTful APIs using FastAPI and Python to process incoming tickets and automate real-time workflow escalations. Designed responsive, role-based admin dashboards to streamline ticket tracking.
- *Tech Used: Python, FastAPI, Machine Learning, NLP, Scikit-Learn, REST APIs*

### Electricity Bill Management System

- Engineered a database-driven Java Swing application integrated with Oracle SQL to automate billing calculations, account management, and payment tracking.
- Architected relational database schemas and optimized SQL queries, stored procedures, and JDBC logic to ensure high-performance data access.
- *Tech Used: Java, Java Swing, JDBC, Oracle SQL, Database Design*

## Internships

### Web Development Intern, ApexPlanet Software Pvt. Ltd. June 2025 – July 2025

- Built responsive user interfaces using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and device responsiveness.
- Developed API-driven web applications and client-side utilities using DOM manipulation and browser LocalStorage.
- Implemented client-side validation and performance optimizations to improve page load speed by 25% and enhance overall UI performance.

### Web Development Intern, Codsoft June 2024 – July 2024

- Built modular, mobile-first UI components and landing pages using HTML, CSS, and JavaScript.
- Collaborated on debugging front-end code bases to resolve layout glitches and cross-browser UI inconsistencies.
- Utilized Git and GitHub for version control, managing code repositories and contributing to collaborative front-end workflows.

## Achievements & Certifications

- **Data Structures and Algorithms:** Certified by IBM.
- **National AR Hackathon:** Participated in the Brain O Vision & AICTE Augmented Reality Hackathon.
- **HackerRank Badges:** Earned Silver Badges in Python and SQL.
